**Title: Newish Bakery**

Newish Bakery is a quaint local bakery focusing on freshly made bread, cakes, pastries, and various high-quality baked items. The suggested website will create a professional digital presence and simplify the process for customers to find the bakery, browse products, and submit inquiries.
Mission: To offer fresh, budget-friendly, and premium baked goods while ensuring outstanding customer service.
Vision: To establish a reliable and well-known local bakery by offering high-quality products and maintaining a robust digital presence.
Intended Audience: Community members, families, students, enterprises, and clients in search of cakes, pastries, and regular baked items.
Please provide the text you would like me to paraphrase. Website Aims and Targets
The site will:
Enhance Newish Bakery's online presence and interaction with customers.
Showcase items distinctly with visuals and text.
Urge customers to inquire and submit orders.
Share important business details like hours of operation and contact information.
Key Performance Indicators (KPIs): Website traffic, views on product pages, inquiries through contact forms, requests for online orders, and interactions on social media.

## 3. Current Website Analysis

Newish Bakery is being approached as a fresh website initiative. Consequently, there is no existing online presence to evaluate. The new site will fulfill the requirement for a professional and user-friendly digital platform.

## 4. Suggested Website Features and Capabilities

The website will feature:

Home: Introduction to the bakery, highlighted products, and prominent calls-to-action.

About Us: Overview, mission, and core values.

Products/Menu: Cakes, bread, pastries, and additional offerings with images and descriptions.

Gallery: High-resolution photographs of bakery items.

Contact: Phone number, email address, location, business hours, and a contact/order inquiry form.

Responsive navigation: The website will function effectively across mobile phones, tablets, and desktops.

## 5. Design and User Experience

The design will be inviting, contemporary, and friendly to embody the essence of the bakery brand.

Colour scheme: Cream, warm brown, soft pink, and white tones.

Font Style: Aptos or a straightforward, legible sans-serif font with prominent headings to establish a clear hierarchy.

Layout: A straightforward grid-based structure featuring pleasing product images and uniform spacing.

User Experience: Intuitive navigation, legible text, easily accessible buttons, and a responsive design will help customers find information swiftly.

A low-fidelity wireframe will be created to illustrate the structure of the homepage, including navigation, product sections, and contact information before development commences.

## 6. Technical Requirements

The website will utilize HTML, CSS, and JavaScript. It will also need a fitting domain name and dependable web hosting. The site will be evaluated across popular browsers and various screen sizes.

## 7. Timeline and Milestones

Week 1: Conduct research, develop a plan, and create wireframes.

Week 2: Establish website layout and visual aesthetics.

Week 3: Develop using HTML, CSS, and JavaScript.

Week 4: Perform testing, make corrections, and prepare for final submission.

## 8. Budget

A projected budget of R3,500–R5,000 will encompass development, basic hosting/domain fees, and initial maintenance costs.

## 9. References

The research will involve pertinent web design standards, documentation for HTML/CSS/JavaScript, Virtual Studio, and analysis of competitor bakery websites to guide the final design.

# Website Project Proposal 2 – Newish Bakery

## 1. Organisation Overview

Organisation Name: Newish Bakery

Newish Bakery is an expanding bakery enterprise dedicated to offering freshly baked and visually appealing products to the local community. The business provides a wide range of items including birthday cakes, cupcakes, muffins, pastries, cookies, and fresh bread. The intended website will act as a digital platform for customers to discover the bakery, browse available products, and communicate directly with the business.

**Mission:** To deliver enjoyable customer experiences through high-quality, fresh baked goods and reliable service.

**Vision:** To position Newish Bakery as the preferred local bakery while broadening its customer base via a strong online presence.

**Target Audience:** Families, students, working professionals, event planners, and customers buying baked goods for special occasions.

## 2. Website Objectives and Goals

Enhancing connection between Newish Bakery and its clients will be the main goal of the website. Its primary goals are to:

- Describe the bakery and reinforce its brand.
- Present goods in a neat and appealing way.
- Make it simpler for clients to ask questions about customized orders.
- Promote seasonal deals, promotions, and new products. Boost the quantity of clients who find the bakery online.

Website visitors, customer inquiries, product views, order requests, and repeat visits are all considered KPIs.

## 3. Analysis of Current Websites

As of right now, Newish Bakery does not have a website specifically for this project. This makes it possible to develop a website from the ground up in accordance with the requirements of the company and its clients.

Enhancing information accessibility and making a professional first impression would be the main goals of the suggested approach.

## 4. Suggested Functionality and Features of the Website

The webpage will include:

**1. Home Page:** Overview of the bakery, highlighted items, and ongoing sales.

**2. Our Story:** Background, principles, and baking details.

**3. Menu:** Products are categorized with pictures, descriptions, and, if relevant, prices.

**4. Special Orders:** Details, including an inquiry form, regarding personalized cakes and event orders.

**5. Gallery:** Pictures of finished cakes and well-known baked goods.

**6. Contact Page:** This page includes contact details, location, business hours, and an inquiry form.

## 5. User Experience and Design

Inspired by the look of a contemporary bakery, the website will have a simple and friendly design. The colour scheme is white, peach, chocolate brown, and beige.

**Typography:** Aptos with obvious heading and body-text hierarchy.

Layout: A simple card-based design with big product images and distinct divisions.

**User Experience:** The website will be simple to use thanks to mobile-friendly pages, call-to-action buttons, and straightforward navigation.

The suggested locations for the navigation menu, banner, product categories, gallery, and contact area will be shown in a low-fidelity wireframe.

## 6. Technical Conditions

JavaScript, HTML, and CSS will be used in the development of the website. It will need a trustworthy hosting provider and a registered domain. To verify usability and responsiveness, testing will be done on various browsers and screen sizes.

## 7. Timeline and Milestones

Research, planning, and wireframe within the first week.

Week 2: Interface design and website structure.

Week 3: Content implementation and development.

Week 4: Final submission, testing, and revisions.

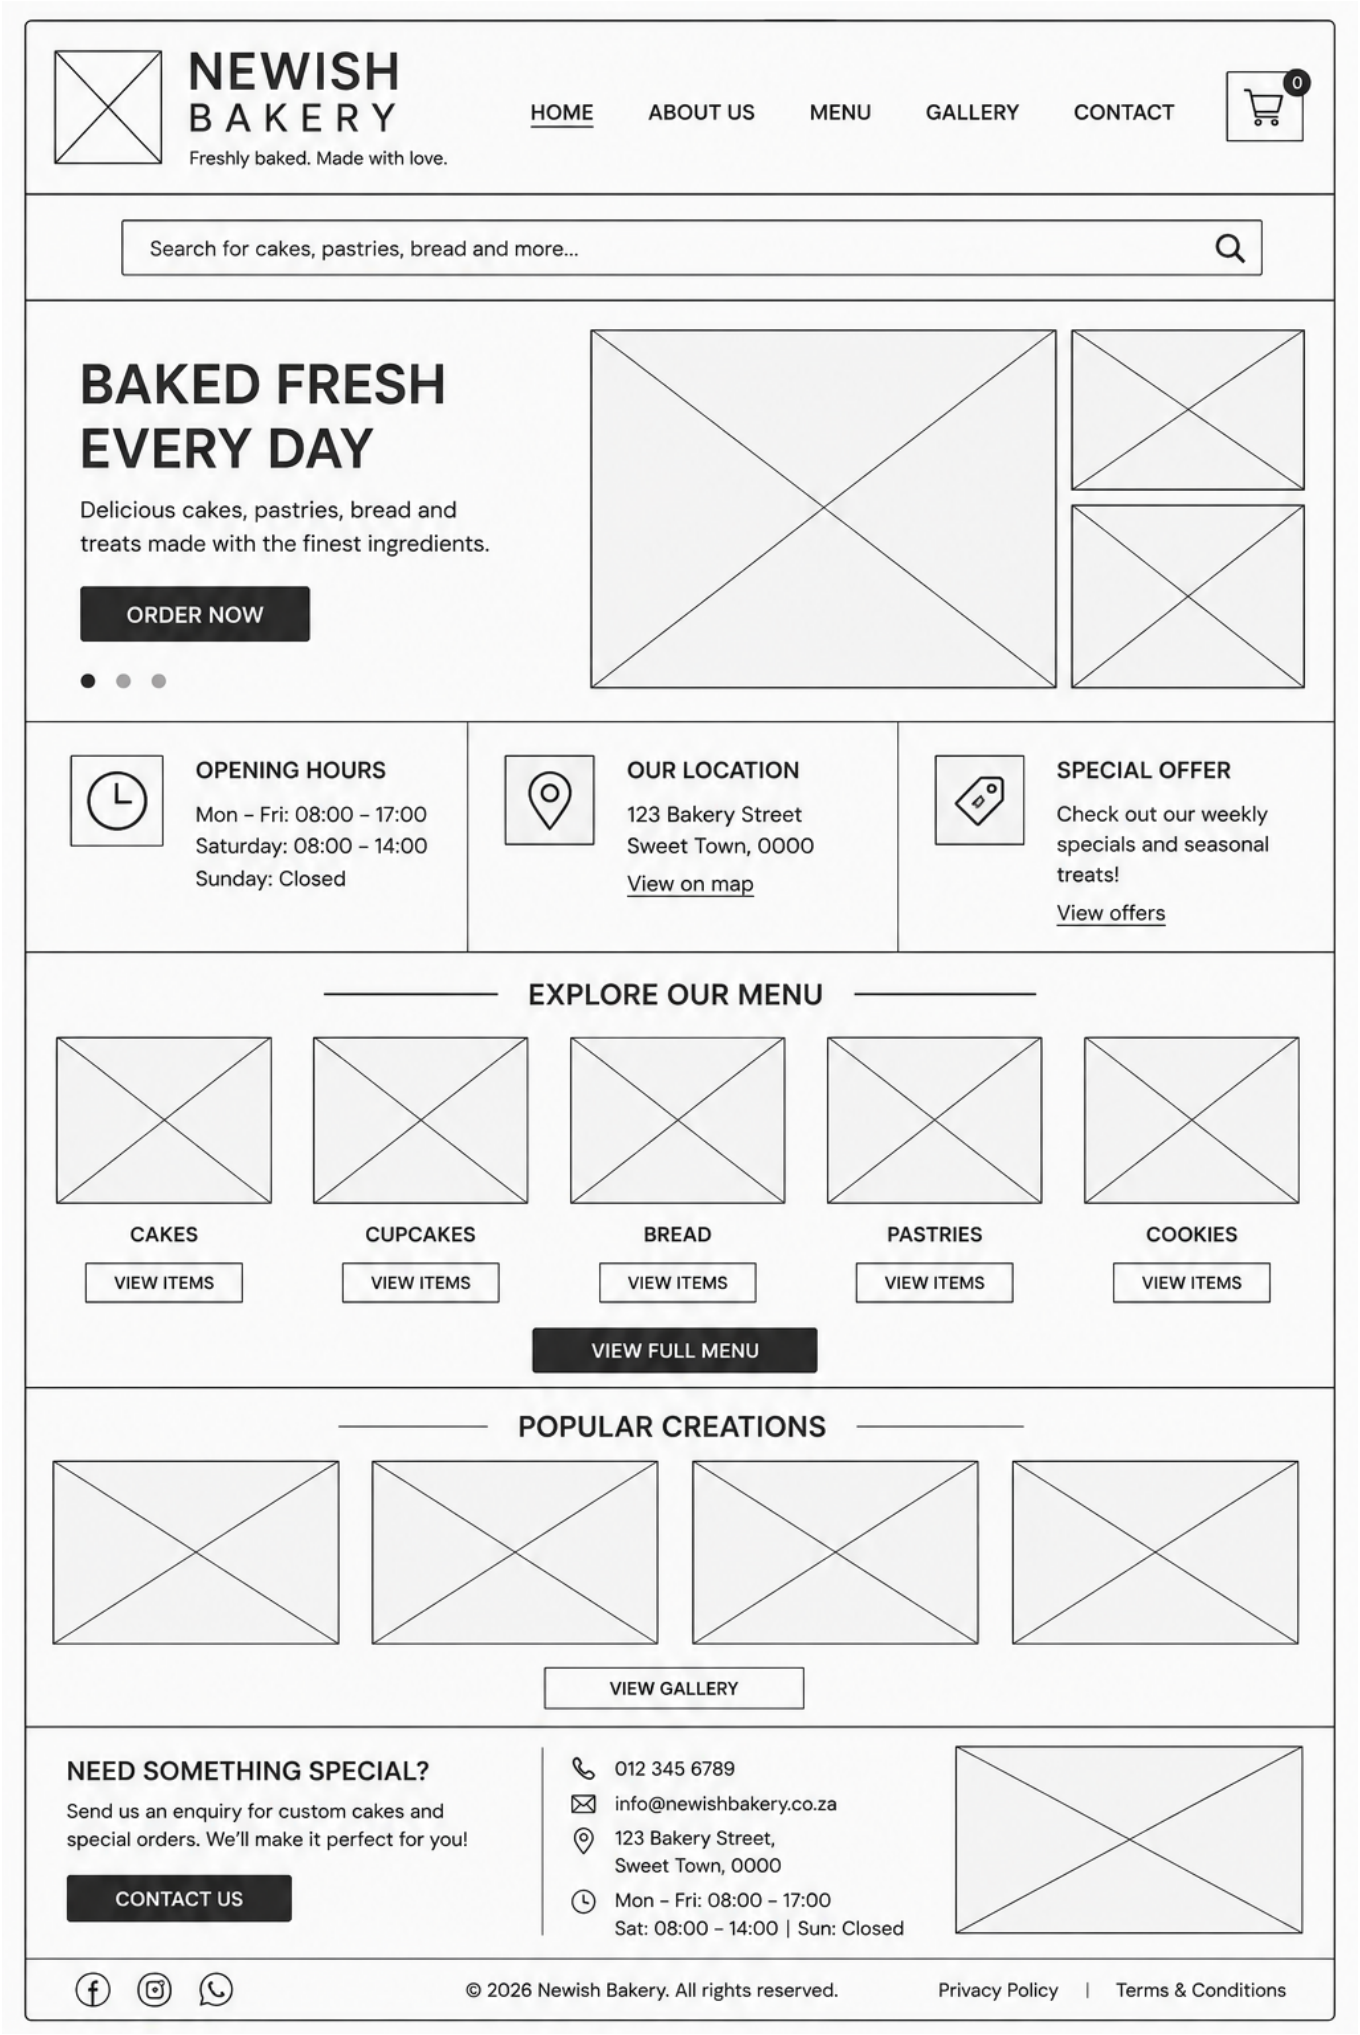

## 8. Budget

The project is expected to cost between R4,000 and R5,500, which includes development, domain registration, basic hosting, and beginning upkeep.

## 9. References

Recognized HTML, CSS, and JavaScript documentation, website usability guidelines/Visual Studio code, and a few chosen bakery websites for design comparison and inspiration will serve as the foundation for the research.
